Silver Oak Academy Thanks Local Employers

Recently, 20 Community Partners were recognized for their contributions for providing employment to the students of Silver Oak Academy. Each Partner received a certificate of appreciation for his support in hiring, training and providing life skills to two school students.

At a dinner event prepared and served by the students and Culinary Department staff of the school, members of the local business community enjoyed a dinner of lasagna, as well as, conversations with the school faculty.

“Our stated aim at the school is to improve the lives of youth and we do this by offering our students a safe educational environment supported by kind, caring and considerate teachers, said Dr. Catherine Gammage, School Principal.

According to Kevin McLeod, Director of Program Culture, “The winning combination of education and real work experience prepares these young men for their lives, ahead. We are grateful for the support that our students receive from the businesses community and we believe in honoring those who help us shape the lives of our students.”
